

State Infrastructure Analysis Tool – Part B

Using Implementation Drivers to Tell the Infrastructure Story

This tool was developed by the Regional Resource Center Program (RRCP) and has been revised by the National Technical Assistance Center on Transition (NTACT). The tool is based on work of the State Implementation and Scaling-up of Evidence-based Practices (SISEP) and the National Implementation Research Network (NIRN).

Part B: SSIP Infrastructure Analysis Template – Describing your Infrastructure: Telling Your Story

Introduction

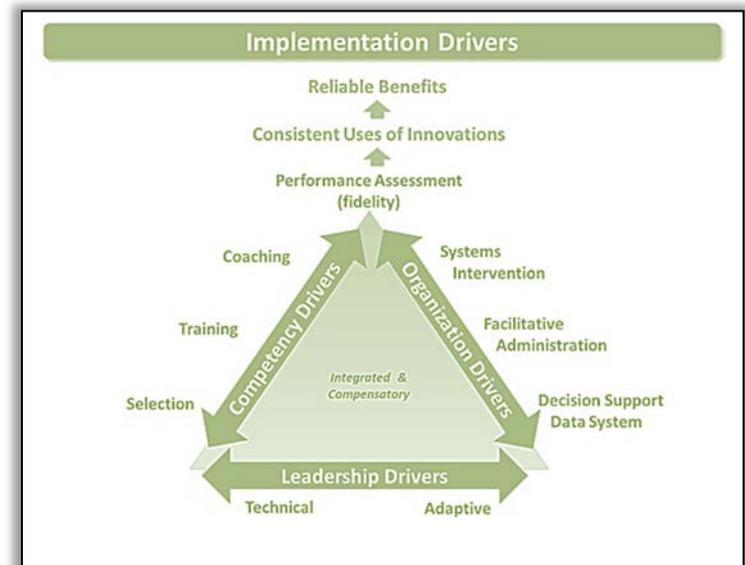

This tool is designed to be used as an aide to states as they consider the requirements for a description and analysis of the states' infrastructure, under the guidance for Phase I of the State Systemic Improvement Plan related to the new State Performance Plan and the Unified or Combined Plan required under the Workforce Innovation and Opportunities Act (WIOA). The tool was originally organized around the Implementation Drivers Framework, developed from work by the National Implementation Research Network (NIRN) and the OSEP-funded State Implementation and Scale-up of Evidenced-based Practices (SISEP) Center and has been adapted to include WIOA. Implementation Drivers are key components of capacity and infrastructure that influence a program's success. They are the core components needed to develop, improve and sustain the ability of staff to implement an intervention as intended, as well as create an enabling context for the new ways of work. When integrated and used collectively, these drivers ensure high-fidelity and sustainable program implementation.

There are three types of Implementation Drivers:

Competency Drivers: Competency drivers are activities to develop, improve, and sustain teachers' and administrators' ability to implement an intervention as intended in order to benefit students. Competency drivers include **performance assessment (fidelity), selection, training, and coaching.**

Organization Drivers: Organization drivers are used to intentionally develop the supports and infrastructures needed to create hospitable, organizational, and systemic environments for new programs and innovations. These supports may need to be developed across the building, district and State levels. Organization drivers include data systems to **support decision making, facilitative administration, and systems intervention.**

Leadership Drivers: Leadership drivers focus on providing the right leadership strategies for different types of leadership challenges. These leadership challenges often emerge as part of the change management process needed to make decisions, provide guidance, and support organization functioning. Leadership drivers include **technical and adaptive leadership.**

When considered collectively, a series of questions around each component with each driver can lead a State Education Agency (SEA)/State Vocational Rehabilitation Agency (VR) to a comprehensive "picture" of the current infrastructure system in the state, and provide insight into areas

Part B: SSIP Infrastructure Analysis Template – Describing your Infrastructure: Telling Your Story

that offer opportunities for improvement. Subsequently, the State will be well positioned to collaboratively describe and build an infrastructure to improve outcomes for students with disabilities.

Guidance for Use of the Tool

It is recommended that the tool be completed by a team comprising SEA/State VR Agency staff and other stakeholders who have pertinent information. It would be helpful for individuals to have the tool beforehand in order to become familiar with the questions. When completing the tool, the group can be divided into smaller working teams, with each smaller team assigned a section of the tool. However, all responses from each small group should be shared and reviewed by the full team. It may not be necessary to respond to each individual question in a given section, but the team should respond to questions as a whole, while using the individual questions, to ensure nothing has been missed. SEAs/State VR Agencies are encouraged to enlist the assistance of technical assistance staff to facilitate this process. Additionally, with the recent passage of WIOA, states are in the process of a comprehensive assessment of their workforce system and developing a Unified or Combined State Plan. Information from that work should be included to help guide conversations in completing this process.

Using the Responses

- The State can use the responses, including the identified opportunities, to frame a narrative that describes the system for the purposes of an infrastructure analysis.
- The State has a list of identified opportunities that can be considered for systems improvement.
- The questions included with each Implementation Driver are cross-referenced with one or more of the SSIP/WIOA Infrastructure components. This will aid teams in identifying strengths and areas for improvement in their Infrastructure description and analysis. A form is included at the conclusion of this tool for that purpose.

Template Sections <i>(ctrl+click to follow link to section)</i>	Page
Performance Assessment Selection	4
Training (Technical Assistance)	8
Coaching	10
Decision Support Data System	11
Facilitative Administration	13
Systems Intervention	16

SSIP Synthesis

19

SSIP	State Systemic Implementation Plan
TA	Technical Assistance
RSA	Rehabilitation Service Administration
WIOA	Workforce Innovation and Opportunities Act

Implementation Drivers Component Questions	WIOA/SSIP Infrastructure Component	What We Know (Strengths)	What We May Need to Improve (Opportunities)	Possible Improvement Strategies and/or Infrastructure Gaps
<p>Performance Assessment – This driver focuses on the evaluation of implementation, both fidelity and results, as well as the assessment of the competent use of skills required for full and effective use of the intervention or improvement strategy. Evaluation is critical for the ability to know if the desired result is evident or if changes need to be made.</p>				
<p>1. How does the state know that improvement activities are implemented with fidelity and are leading to the desired change?</p> <p>a. How does the state determine targets for improvement and select appropriate measures?</p> <p>b. How frequently is evaluation data collected and reviewed?</p> <p>c. How are data being used to make decisions that can improve fidelity of implementation in improvement activities?</p> <p>d. What and how are data given to schools, districts, intermediate education agencies, VR field offices/staff, as feedback?</p> <p>e. How does the state support LEAs/VR field</p>	<ul style="list-style-type: none"> • Accountability • Quality Standards • Performance Measures

Implementation Drivers Component Questions	WIOA/SSIP Infrastructure Component	What We Know (Strengths)	What We May Need to Improve (Opportunities)	Possible Improvement Strategies and/or Infrastructure Gaps
<p>offices in using performance assessment processes and fidelity data to inform and engage local staff as new skills are implemented and refined?</p> <p>f. What State agencies are using the WIOA common metrics beyond the required CORE WIOA partners?</p> <p>2. What evaluation mechanisms/systems are in place to ensure your efforts are effective?</p> <p>a. Who is responsible for collecting and analyzing evaluation data?</p> <p>b. How are evaluation criteria established?</p> <p>c. How are evaluation data collected?</p> <p>d. How are data used to improve professional development, coaching, or other processes?</p> <p>e. How are guidelines, policies, and procedures evaluated to ensure they support improvement efforts?</p> <p>3. What data and procedures does the state use to ensure the effort is sustainable over time?</p> <p>4. How is state leadership kept informed about the effectiveness of the overall general supervision system?</p>				

Part B: SSIP Infrastructure Analysis Template – Describing your Infrastructure: Telling Your Story

Implementation Drivers Component Questions	WIOA/SSIP Infrastructure Component	What We Know (Strengths)	What We May Need to Improve (Opportunities)	Possible Improvement Strategies and/or Infrastructure Gaps
<p>Selection – Selection refers to having in place clear criteria for making decisions about selecting the improvement strategy, as well as selecting those who will participate in the implementation of the strategy (i.e., staff, LEAs, and schools).</p>				
<p><u>Improvement Initiative Selection</u></p> <ol style="list-style-type: none"> 1. What processes, guidelines, or criteria do you use for selecting improvement initiatives? 2. What processes, guidelines, or criteria do you use when selecting: <ol style="list-style-type: none"> a. Professional development or technical assistance for statewide or regional activities? b. Participants to invite to statewide or regional professional development or technical assistance activities? 3. What processes, guidelines, or criteria do you use when selecting evidence-based or successful practices to promote to LEAs/VR field offices and staff? 	<ul style="list-style-type: none"> • Professional Development • Technical Assistance • Governance (to some extent) • Quality Standards • Performance Measures 			

Part B: SSIP Infrastructure Analysis Template – Describing your Infrastructure: Telling Your Story

Implementation Drivers Component Questions	WIOA/SSIP Infrastructure Component	What We Know (Strengths)	What We May Need to Improve (Opportunities)	Possible Improvement Strategies and/or Infrastructure Gaps
<p>a. Selecting LEAs/VR field offices and staff that have been successful in improving results for students with disabilities and sharing information with other LEAs/VR field offices and staff?</p> <p>b. Selecting and disseminating evidence-based practices used within the state or in other states?</p> <p style="text-align: center;"><u>Stakeholder Selection</u></p> <p>What processes, guidelines, or criteria do you use for the selection of stakeholders from other divisions within the SEA/State VR Agency?</p> <p>4. What processes, guidelines, or criteria do you use for selecting stakeholders outside of the SEA/State VR Agency to be included in an improvement initiative?</p> <p>a. Organizations</p> <p>b. Individuals who might best represent an organization or issue</p> <p style="text-align: center;"><u>Participant and Staff Selection</u></p> <p>5. What processes, guidelines, or criteria do you use when selecting LEAs/VR field offices</p>				

Part B: SSIP Infrastructure Analysis Template – Describing your Infrastructure: Telling Your Story

Implementation Drivers Component Questions	WIOA/SSIP Infrastructure Component	What We Know (Strengths)	What We May Need to Improve (Opportunities)	Possible Improvement Strategies and/or Infrastructure Gaps
<p>that may be required—or highly encouraged—to participate in improvement initiatives?</p> <p>a. How do you engage LEAs/VR field offices in data-based decision making?</p> <p>b. How do you select the support (PD/TA) for local improvement efforts?</p> <p>6. What processes, guidelines, or criteria do you use when selecting:</p> <p>a. Staff to lead improvement initiatives?</p> <p>b. Teams and team members needed to support the implementation of initiatives?</p>				
<p>Training (Technical Assistance) – Fully developed training and TA is central to successful implementation. It is critical to have a well-defined training/TA plan before initiating the implementation of any improvement strategy.</p>				
<p>1. What is the role of the SEA/State VR Agency in professional development for teachers, administrators, VR staff, families, school boards, etc.?</p> <p>a. What part does the state play in the identification, development, and delivery of professional development?</p> <p>b. How is the SEA/State VR Agency made aware of professional development needs?</p> <p>2. Who are providers and partners in statewide or regional professional development?</p> <p>a. What is the role of IHEs in providing</p>	<ul style="list-style-type: none"> • Professional Development • Technical Assistance • Quality Standards • Performance Measures
